PROJECTS

ExtraLarge | (React/Redux, Rails, PostgreSQL)

[Live](#) | [Github](#)

A single-page web app for creating and publishing content, inspired by Medium

- Normalizes database to reduce dependencies and allow for seamless integration of new data types
- Secures API endpoints from raw AJAX calls by validating the sender's authentication token
- Maximizes scalability through cloud image storage with AWS
- Prevents timing attacks through constant time string comparison and database lookup

Shoot10 | (JavaScript ES6, Canvas)

[Live](#) | [Github](#)

A single-player game in which players try to destroy as many ships as they can with only 10 bullets

- Employs trigonometric formulas to create a perfect circle of exploding debris
- Implements collision check between bullets and ships
- Utilizes HTML5 Canvas for fluid animation and modern design

Ruby Record | (Ruby)

[Github](#)

An ORM storage method that allows for easy storage and retrieval of data

- Applies Ruby metaprogramming to write modular methods for SQL associations
- Provides object-relational mapping with support for single and multi-step associations
- Includes model level validations for presence, uniqueness, and field length
